

DE-027 - Hinge

Product Code: DE-027
Weight: 0.00kg
Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

DE-027 Hinge

A hinge is a machine element that connects two bodies allowing angular movement about a fixed axis of rotation, all the while preventing translations and rotations on the remaining two axes. A hinge can be considered as a journal bearing with only one degree of freedom where a shaft is rotating in a hole. Hinges only allow one rotation, either yawing (the most common), pitching, or rolling.

Specification

Suitable for the following equipment models:	
EVO 4 E	
EVO 4 EDLF	
EVO 4 ELF	
EVO 5 E	
EVO 5 ELF	
Spare Part Type	
Pneumatic Component	
Spare Part Group	
Others	
Stock Type	
Standard Stock
